Selecting the correct ear tip

Age	Ear tips inserted against ear canal	Ear tips inserted against entrance of ear canal			Ear tips for Echo-Screen*	Ear tips for AccuScreen*
0.5 y/o		 Green pediatric			 4.0 mm, ANA	 3.7 mm, AOT
			 3-5 mm, flanged	 3-6 mm, green	 4.5 mm, ANA	 4.0 mm, AOT
		 7.5 mm, umbrella	 4-7 mm, flanged	 6 mm, yellow	 5.0 mm, ANA	 4.5 mm, AOT
		 9 mm, umbrella	 5-8 mm, flanged		 infant tree, ANA	 5.0 mm, AOT
		 10 mm, umbrella	 7 mm, mushroom	 7 mm, red	 7 mm, yellow	
		 11 mm, umbrella	 8 mm, mushroom	 8 mm, blue	 8 mm, red	
		 13 mm, umbrella	 9 mm, mushroom	 9 mm, green	 9 mm, blue	
			 10 mm, mushroom	 10 mm, yellow	 10 mm, green	
		 15 mm, umbrella	 11 mm, mushroom	 11 mm, red	 11 mm, yellow	
			 12 mm, mushroom	 12 mm, blue	 12 mm, red	
Adults	 19 mm, umbrella	 13 mm, mushroom	 13 mm, green	 13 mm, blue		
		 14 mm, mushroom	 14 mm, yellow	 14 mm, green		
		 15 mm, mushroom	 16 mm, red	 16 mm, yellow		
		 22 mm, umbrella	 19 mm, mushroom	 18.5 mm, blue		

Selecting the correct size of ear tip takes practice

In general, flanged or mushroom-shaped ear tips will be used for most testing (Impedance, DPOAE, TEOAE and Automated ABR).

Sometimes, an umbrella-shaped ear tip will be used for performing a quick impedance screening.

The table can be used as a guide to help you select the appropriate ear tip size.

Disposable Sanibel™ ADI ear tips

For use with the following acoustic immittance instruments and otoacoustic emission systems with CLEAR probe tip: Amplivox: all OtoWave versions. Interacoustics: Titan, AT235, AA220, Eclipse, MT10, Sera. Maico: EasyTymp, MI 22, MI 23, MI 24, MI 26, MI 34, MI 44, Easyscreen

8110364	Bag/4 pcs

Sanibel™ Probe Tube Removal Tool

- A = Probe
- B = Probe Tube Installer
- C = Attachment to probe cable
- D = Tube Remover

To Remove a Probe Tube

1. Place the front hole of the Probe Tube Tool over the end of the probe, as shown. The probe should be seated against the face of the tool and snap in place.
2. Squeeze the tool closed and hold it.
3. Twist the tool a couple of times while holding the tool closed and pulling away from the probe.
4. The probe tube will pull out from the probe. Discard the probe tube.

To Install a New Probe Tube

5. Place a new tube into the hole on the top of the tool.
6. Align the probe with the tube.
7. Push the probe onto the probe tube until the probe contacts the face of the probe tube tool and a snapping sound is heard.
8. Slide the tool off leaving the tube in place in the probe.

VOLUME DISCOUNT AVAILABLE for minimum orders of 6 bags

3A E-A-RLINK™ foam ear tips
Complies to all insert phones. 13.7mm

Part no.	Description	Unit
8106226	Adult/Medium size	Bag/100 pcs

The "REM effect"
– better fitting & fewer follow-ups!

Use Sanibel™ probe tubes for any equipment

We often hear from the industry that only the manufacturers' specific probe tubes should be used with their specific equipment. However, a recent comparative study by Sanibel Supply® disproves this myth.

In this study, our in-house audiologists and engineers compared the effects of different probe tubes on an Affinity^{2.0} system. They compared AudioScan tubes (red), Otometrics tubes (blue), Sanibel™ tubes (orange) and Sanibel™ tubes (grey).

This involved running each tube via the 'tube calibration' process and then comparing the following REUG curve when the tube had been left in the calibration position.

The investigation showed no significant difference in the REUG curve and all probe tubes achieved the same result when the calibration process had been run correctly.

HIF

Silicone tubes for SPL60™

For use with Affinity™ REM probe.

Part no.	Unit
8500700	Bag/50 pcs

HIF

Sanibel™ REM probe tubes, type A

Universal fit, length 76 mm, beveled 45° angle tip and black marker ring.

Part no.	Unit
8104116	Tray/50 pcs

HIF

Sanibel™ REM probe tubes, type B

Cost efficient, length 80 mm and marker ring.

Part no.	Unit
8500360	Bag/40 pcs

HIF

Audioscann probe tubes

Compatible with Audioscan, Axiom and Verifit equipment

Part no.	Unit
8251215	Tray0 pcs

Sanohra Earplugs Fly

Sanohra Fly ear plugs. Reduces ear pressure experiences when flying.

Part no.	Description	Unit
8519351	EarPlugs Fly Kids, EN	1 set
8519352	EarPlugs Fly Adult, EN	1 set

Sanohra Earplugs Swim

Sanohra Swim earplugs. Enables people to swim without getting water in the ear, reducing ear infections.

Part no.	Description	Unit
8519353	EarPlugs Swim Kids, EN	1 set
8520143	EarPlugs Swim Adult, EN	1 set

SANOHR A fly ear plugs

Beyond "noise protection" it can be important to protect the ear drum (tympanic membrane) from changes in external pressure that are too rapid, e.g., during take off and landing phases in airplanes. For airplane passengers experiencing a problem with the pressure equalisation, the use of a special ear protection product means freedom from an unpleasant feeling or piercing pain during flight.

SANOHR A swim ear plugs

In case of injury to the ear drum or insertion of a vent tube, it is necessary to prevent water from reaching the ear drum through the outer auditory canal. Swimming, bathing or showering might cause inflammation of the middle ear. Staying in chlorinated water for an extended period of time can cause the skin in the outer auditory canal to swell and cause inflammation (otitis externa).

Vermed Prewired neonatal eeg

electrode for use in pediatric and neonatal settings. 3 electrodes per pouch. square shape 22.2x22.2 mm

Part no.	Unit
8107425	Bag/300 pcs (3x100 set)

ABR

Vermed Economy line Snap Wet Gel Electrode

Non-woven cloth electrode with conductive wet gel. Passed ISO 10993 and is Latex free. Intended use areas: Newborn, Diagnostic follow-up all ages.

Part no.	Unit
8516251	Box/50 pcs (20x50 pcs)

ABR

1000 pcs

60 pcs

ABR

Vermed Allround ECG electrode

Provides very good impedance and it well suited for both newborns and adults. Can be used both as snap and tab electrode with alligator cables. Pouches come in 3 pcs, value packs available in 600 pcs. per order. Please contact for order.

Part no.	Unit
8516906	Bag/5 pcs

ABR

Disposable electrodes

Ambu® 0415M tab electrode

Medium size tab electrode with solid gel for 12-lead ECG. Presented conveniently with 10 pieces to a card. Fish tail tab design reduces electrode lift-offs. Suitable for both adults and children. Intended use areas: ABR Diagnostics of all kinds with Tab electrodes.

Part no.	Unit
8516138	Bag/100 pcs (10x10 pcs)

Ambu® 2300 Blue Sensor Tab electrode

The medium size Ambu BlueSensor 2300 electrode features a skin-friendly solid gel that provides optimal signal quality recordings during 12-lead diagnostic resting ECG application. Very suitable for ABR diagnostics of all kinds. Intended use areas: ABR Diagnostics of all kinds.

Part no.	Unit
8516139	Box/1000 pcs (10x100 pcs)

Ambu® Blue Sensor™ N-00-S

Foam ECG electrode for use with button cables. Wetgel.

Part no.	Unit
8013029	Bag/25 pcs

Ambu® Ground electrode 71410-M/1

Part no.	Unit
8500680	1 pc

Ambu® Neuroline 720

Ambu Neuroline 720 electrodes are pre-gelled and self adhesive. They are ideal for use in sleep registration where the strong, yet skin-friendly, adhesion ensures that the electrode stays in place for the entire examination, even if the patient sweats. Intended use areas: ABR Diagnostics of all kinds.

Part no.	Unit
8500060	Bag/25 pcs

Ambu® Blue Sensor™ P-00-S

High quality Ag/AgCl sensor – ensures excellent trace quality.

Part no.	Unit
8504783	Bag/50 pcs

Ambu® Neuroline 720 - with 100 cm cable and k-connector

Ambu Neuroline 720 electrodes are pre-gelled and self adhesive. They are ideal for use in sleep registration where the strong, yet skin-friendly, adhesion ensures that the electrode stays in place for the entire examination, even if the patient sweats. Intended use areas: ABR Diagnostics of all kinds.

Part no.	Unit
8503244	Bag/10 pcs

Ambu® Blue Sensor™ N-10-A

Foam ECG electrode with 10 cm wire and 4 mm connector, for use with universal electrode cable. Wetgel.

Part no.	Unit
8500670	Bag/25 pcs

Ambu® Neurology Needle Electrode

This needle electrode features exceedingly low penetration-resistance levels. The needles have been coated with smooth coating which reduces friction when inserting and working in the target area.

Part no.	Unit
8519037	Box/40 pcs

Disposable electrodes

50 pcs

Ambu® Blue Sensor™ M-00-S

High conductive wet gel with occlusive backing material making it liquid resistant

Part no.	Unit

Ambu White Sensor 40554

Specifically designed for babies and newborns.

Part no.	Unit
8520431	Bag/3 pcs

Surface electrodes tailored to your need

At Diatec we believe that it is important to choose the right surface electrode for each specific recording and patient type.

Wetgel or hydrogel electrodes?

A wetgel electrode consists of water, thickener, ionic salts, surfactants and bactericides or fungicides. Wetgel migrates easily and rapidly onto the skin surface, reducing impedance levels, which in turn will generally result in lower noise in the recording.

A hydrogel surface electrode is less adhesive when compared to wetgel, making it particularly suitable for newborns.

Chloride salt concentration

The higher the chloride salt content, the more conductive the electrode. Higher salt content (10% and above), pre-gelled surface electrodes are useful for making fast, high quality measurements of biopotentials. High conductivity electrodes generally have reduced artifact, due to the lower impedance generated between electrode and skin surface. As the chloride salt content drops, there is a corresponding reduction in electrode conductivity.

If the chloride content is below 10%, the electrode can then be employed for longer recording times, with a reduced risk of skin irritation. As a rule of thumb, wetgel has a chloride content of 10% and hydrogel 4%.

It is important to use electrodes with similar chloride salt content when testing.

The impedance of the electrode/skin junction is highly dependent on the electrolyte type and the chloride salt concentration. For example, a hydrogel electrode with 4% chloride concentration will have approximately 10x higher impedance than a wet liquid gel electrode with 10% chloride concentration, after first application to the skin.

Adhesion

An advantage of a conductive adhesive is that the active surface can be as large as the electrode itself because no additional adhesive strip is needed. The Sanibel disposable electrodes come with a range of adhesive qualities. All electrodes are designed to adhere well to skin surfaces, but the adhesion characteristics can be grouped according to the application:

- Strong adhesive
- Moderate adhesive

Strong adhesion is not recommended for newborns.

Skin preparation

For optimum electrode to skin conductivity, the skin should be lightly brushed with a gentle abrasive gel/wipe.

An alcohol wipe is not recommended to improve conductivity as this will only dry out the skin surface.

ABR

Sanibel™ ECoChG starter kit

For Eclipse™ and Bio-logic® AEP system. Includes cable, gel and 2 pcs TM electrodes.

Part no.	Unit
8013209	Set/4 pcs

ABR

Sanibel™ ECoChG cable

For Eclipse™ and Bio-logic® AEP system. 1.5 mm/.060" female connector. For use with Sanibel™ TM electrodes.

Part no.	Unit
8500650	1 pc

After use ...

After use, cables should be wiped with a soft cloth that has been dipped in a mild detergent solution or alcohol.

Contact between the cleaning solution and the connectors should be avoided.

Solo lid bag. Wipe size: 300 x 245mm.

Part no.	Unit
8000210	Bag/225 pcs

Infection control

A clean clinic is also part of your professional image

Infection control is so much more than cleaning probe tips, protecting your personal computer's keyboard, and maintaining high standards within hygiene using e.g. disinfectant detergent for a quick and extensive disinfection of non-invasive medical devices.

When it comes to infection control, preventing germs, dirt and dust from spreading via other sources, is also of critical importance – both to the safety of your patients and yourself! Gloves, shoe covers, facemasks, and aprons are just some of the "accessories", which can help you succeed in this.

Maintain high, professional standards and make your clinic an ever-safe environment for your patients, making the wearing of gloves, facemasks and other body protection wear a natural part of the "patient interaction" process.

Personal Protective Equipment

Bouffant Caps

Perform high Hygiene practices in front of your patients or clients.
